VoiceCare is a frequency technology that captures the roots of physical and mental, detecting brain frequencies through five minutes of recording. It can analyze and adjust the root of physical and mental problems to break through the current situation and control life.

Analysis includes mental states, emotional states, behavioral patterns, subconscious states, energy states, and so on. Physical health detection includes physical and mental state, brain state, body system, body organ state , etc.

After this analysis, the VoiceCare system can customize a tailor-made frequency therapy for you to restore balance between your mental and physical health. VoiceCare let you live a healthy life both physically and mentally.

After 30 years of research and practice, VoiceCare is now widely used in Europe and the United States of artificial intelligence technology. It has received several international certifications and has been rated as "an effective and revolutionary bioinformatics technique for diagnosing and treating a wide range of human diseases".

Now you can experience this innovative technology without risk, which has been recognized by many international organizations!

Signed up for her Voicecare Emotional Analysis report, Jade has been a very professional and caring Emotional Engineer, she guided me to **know myself better from different aspects**. I am amazed at the results of the emotional analysis report as i find it **very accurate and it was purely generated through my voice frequency!**

After the analysis, I'm **more aware of the deeper reasons or my subconscious mind behind my usual behaviour** and thinking, and started to jump out of my comfort zone. It is not easy to make the changes, sometimes it can be painful, but **I'm glad I've done it!** A big Thank you to Jade for her encouragements.

Would definitely recommend this to my friends! Kind of like a mental consultation session for me, but without any stress! Special thanks to master Eddy. Like the way he delivered the messages and explanation to me. Like talking to an old friend, **it also made me more understand of my weakness and strength.**

Jade is a caring coach, she listens attentively and shares her stories that I can connect to very well. Jade helped me to **track down the root causes of my issues- constantly plagued with self-doubt and worries**. She has given clear, practical steps that I can follow to overcome my negativity. After a session with Jade, I believed that I **can help myself to transform and be happier**. This session is definitely highly recommended!

Thank you to Teacher Leo on today's Zoom live sharing. A very good recommendation for those who want to **know more of yourself**. They have a very great technology system that can **capture your personality using AI system**.

FAQ

1 How accurate is the report?

The data in the report is derived from your 5-minute voice recording. Through your sound waves, brain frequencies are detected. The data is analysed with over 99% accuracy.

2 How do I perform the voice recording?

There are 2 ways to record your voice: -

- i. Use iPhone/iPad to perform the voice recording for only 3 minutes at your convenience, it is very fast and easy. We will provide the recording manual, guide and reading script to follow. A one-on-one consultation will be scheduled through Zoom after the report is generated.
- ii. Come to the VoiceCare Centres in Kelana Jaya (PJ) to do the voice recording together with a one-on-one consultation. The whole process will take about 1 hour to complete.

3 Who can take this voice recording/ frequency test?

Anyone who can speak, regardless of gender, race, or age, can take the test. For those under the age of 18, a parent or guardian can purchase the report on behalf of their child. We ask that parents or guardians make the most appropriate choice for their child, provide us with accurate information, and assume all responsibility.
